

Track Engineer

Position Description – Infrastructure

Team:	Track Engineering	Location:	Auckland
Reports to:	Engineering Team Leader Track		
Role Type:	Permanent		

About Us

KiwiRail’s Role in Aotearoa, New Zealand

KiwiRail, a proud State-Owned Enterprise, delivers sustainable and inclusive growth for our customers, communities, and people.

For more than 150 years, rail in New Zealand has connected communities, delivered freight and passengers around the country, and showcased our spectacular scenery to the world. Our purpose—Hononga Whaikaha, Oranga mo Aotearoa (Stronger Connections, Better New Zealand)—speaks to connection with our customers and the future needs of their businesses, connection with the communities we serve and operate in, and connection with each other. KiwiRail is carrying this legacy into the future, delivering connected rail and shipping transport services that create economic, social, and environmental value for New Zealand and New Zealanders.

Our Workplace

At KiwiRail, our values define the behaviour we expect from everyone. We have a team of over 4500 people, and every connection we make with each other, our union partners, our customers and all our stakeholders must be of the highest standard.

Safety, health, and well-being are our number one priority, ensuring our people return home safe and healthy every day.

About the Role

Purpose of the role

KiwiRail is in a phase of significant transformation to modernise and grow our rail and Interislander ferry services in Aotearoa.

The Track Engineer supports KiwiRail's Engineering function by delivering technical excellence and continuous improvement across track infrastructure. This role contributes to the development and maintenance of safe, reliable, and efficient rail assets through proactive asset management, assurance activities, and technical advisory. It plays a key part in shifting from reactive to predictive maintenance, ensuring compliance with standards, and enhancing customer satisfaction.

Key Accountabilities

Within the area of responsibility, this role is required to:

- Improve the management of track geometry, rail condition, and associated infrastructure assets.
- Provide technical advice and support for track maintenance, upgrades, and asset lifecycle planning.
- Contribute to the development and revision of engineering standards, specifications, and learning modules.
- Support assurance activities and use findings to drive continuous improvement.
- Participate in type approval processes for new products and third-party infrastructure impacts.
- Conduct risk assessments and contribute to Safety in Design (SiD) processes.

Key challenges

- Balancing the need for proactive asset management with operational demands and resource constraints.
- Ensuring alignment of engineering practices with evolving international standards and KiwiRail's strategic goals.
- Influencing change across diverse stakeholder groups while maintaining compliance and safety.

What you will do to contribute

Health Safety and Wellbeing	• Prioritise safety in all engineering activities and decisions. • Identify and mitigate engineering safety risks. • Ensure compliance with rail safety standards and statutory requirements. • Lead by example in promoting a safe work environment. • Participate in and support safety conversations and incident reporting.
Customer Focus	• Provide responsive technical support to internal and external stakeholders. • Ensure engineering solutions meet customer needs and expectations. • Collaborate with operations and project teams to deliver value-driven outcomes. • Promote customer-focused improvements in asset performance.
High Performing Teams Skills	• Collaborate across engineering and operational teams to share knowledge and best practice. • Contribute to the development of learning and development modules. • Support team capability through mentoring and technical briefings. • Participate in technical committees and working groups.
Commercial Acumen	• Support cost-effective engineering decisions through sound asset management. • Contribute to product evaluations and type approvals that deliver long-term value. • Understand the commercial impact of engineering standards and assurance outcomes. • Assist in identifying opportunities for efficiency and innovation.
Technical Excellence and Innovation	• Research and apply international best practices and standards. • Contribute to the continuous improvement of engineering principles and documentation. • Use assurance findings to drive innovation and eliminate poor practices. • Engage in professional development and cross-disciplinary learning.

Decision Making

The position is accountable for decisions regarding all project operational objectives and for the provision of advice to project team members and relevant stakeholders on day to day operational decisions.

Key decision-making requirements of the position include:

- Recommending changes to standards and practices based on assurance findings.
- Approving third-party infrastructure impacts in line with KiwiRail policies.
- Contributing to type approval decisions and technical briefings.

Human Resources Delegations	Nil
Direct reports	Nil
Finance Delegations	Nil
Budget (operating and capital)	Nil
Travel Delegations	Yes approves national travel
Statutory powers	Nil

Physical demands and the nature of work

This role is administration-based and requires:

- prolonged sitting and high computer usage
- limited walking, standing, twisting, bending (at the waist), crouching (bend knee)
- carrying of laptop and paperwork when alternating between home and office
- limited lifting of up to 7 kg archive boxes

Your role may include other tasks suited to your level, as your manager directs. This job description shows your current duties. We'll review and update it with you if your responsibilities change.

About you

Knowledge and experience

- You have 5+ years' experience in civil or railway engineering environments.
- You're experienced in asset management and/or infrastructure design.
- You understand railway engineering principles and standards.
- You've worked with assurance processes and technical documentation.
- You're familiar with international standards (AS, EN, ISO).

Ways of working / Work-related qualities

- You prioritise safety and act with integrity in all situations.
- You communicate clearly and confidently with diverse audiences.
- You collaborate effectively and contribute positively to team outcomes.
- You stay calm under pressure and adapt to changing priorities.
- You seek continuous improvement and apply feedback to grow.

Other Requirements

- You can pass regular drug and alcohol screenings.
- You hold a current and valid NZ driver's licence.
- You're willing to travel nationally as required.

Qualifications

- You have a tertiary qualification in a relevant engineering discipline (Washington, Sydney, or Dublin Accord), or equivalent industry experience.
- Chartered Engineer status or working towards it is desirable.
- Postgraduate qualifications in engineering or asset management are advantageous.
