

Rail Network Rebuild

MANUREWA 24/7 RAIL CONSTRUCTION WORKS

October 2025

Dear neighbour,

KiwiRail is rebuilding the rail network in your area to make rail travel more resilient and reliable and to prepare for the more frequent trains the City Rail Link (CRL) will bring when it opens next year. We are progressing a major upgrade of our rail network in South Auckland, including Manurewa.

During the extended four-day Labour weekend (see dates left), **KiwiRail will continue to install a new turnout track structure and overhead electric lines in Manurewa, near your property. Some of these works will happen day and night** so we can complete them as quickly as possible. Equipment will be delivered to our work site from Friday 17 October.

A full rail network shutdown is scheduled over the four days. Passengers are encouraged to check the AT Mobile app or visit the AT website to plan their travel at.govt.nz/journeyplanner

Our team will return to this location to complete these works during the four-week Summer Rail Closure scheduled for December-January 2026.

This is part of the Rail Network Rebuild programme to prepare Auckland's rail network for increased services, shorter journeys, and more frequent trains as part of the CRL.

What we are doing:

We are undertaking major track works in your area. This work can generally only be done during extended periods when no or reduced numbers of commuter trains are running.

The work will involve physically lifting and then tamping the track and new turnout track structure, which allows trains to switch tracks, to the final design alignment. Our teams will also install overhead electric lines to power the new track structure.

This will be put in place in the rail corridor as marked in the map (overleaf). For part of this work, we will use an elevated work platform (EWP, or crane) to allow our team to safely work at the required height. The EWP may overlook some nearby properties for a short period of time.

We will also carry out civil works to hold new signalling and communication cables, as well as install concrete foundations to hold new overhead masts.

Teams will need to do further completion works at a later date to install new overhead masts and new overhead contact wires, which power the electric trains using the turnout to switch tracks. We will notify you when this work is scheduled.

Thanks for your patience while we carry out this important work - The KiwiRail team.

To find out about your public transport options during the Rail Network Rebuild visit www.at.govt.nz or call 09 366 6400.

ABOUT THE CONSTRUCTION SITE

How this affects you:

There will be noise from machinery and heavy vehicles moving around as well as bright lights and KiwiRail teams in the area.

Our staff are mindful of our neighbours and will work to minimise any disturbance. Wherever possible staff will aim to carry out noisier works during the day. However, despite their efforts this work may cause you some disturbance and we apologise in advance for this.

We will be using part of the parking area behind **City Fitness, 6 Maich Road, Manurewa** to store equipment including the crane. Traffic management will be in place, so please take extra care when in the area.

The overhead electric lines will be installed in the rail corridor as marked with the orange line on the map below. Our team will access the work site via the car park, behind City Fitness, marked with the yellow circle.

Thanks for your patience while we carry out this important work - The KiwiRail team.
